MEMO

MEMO is an application to take some notes. This application is basically inspired by sticky notes that are used to write down memos or important notes. Besides, MEMO can also be used to write down your to-do-list.

DESIGN

MEMO has a simple minimalist design to suit its simple function. The purpose of its simple design is to let user to take notes directly in a fast and efficient way. To input new memo, user can write down the notes in the input box and click add. To delete the memo, user just need to long press the memo and it will automatically be deleted.
